

SEALANT(S) POST-OPERATIVE INSTRUCTIONS

The following information is provided to aid you and your child after he/she has had routine dental treatment of the placement of sealant(s) in our office.

Sealants are placed on the teeth without the use of local anesthesia. Your child may feel his/her teeth do not fit together properly for a few days. Crunching ice or eating sticky foods (such as candy) should be avoided because it might dislodge or break the sealant. We will check the sealants at each exam. The longevity of the sealant is based on diet and hygiene practices.

Please call us with any questions at 406-587-KIDS(5437)
